

Varicose Vein Treatment

Welcome to Hays Surgical Associates for the treatment of varicose veins. Here, Dr. C. Erik Anderson can address all of your leg vein concerns. Dr. Anderson is a fully trained general surgeon with a special interest in the treatment of varicose veins.

While most vein treatments and procedures have a medical indication and are covered by most insurance companies, some procedures are deemed cosmetic and will not be covered. In the event of an uncovered procedure, you will be billed for the charges incurred. Dr. Anderson participates with all major insurance companies, including Medicare, and his staff will make every attempt to obtain payment from your insurance carrier. During your initial complimentary consultation, Dr. Anderson will inform you of the likelihood of having your treatments covered by insurance and the potential costs that may be incurred in the event of uncovered procedures.

We offer an array of services for the treatment of varicose veins, including the use of a state-of-the-art Dornier D940 laser, designed specifically for the treatment of venous disorders. Using this laser system, your varicose veins can be addressed in a comfortable office-based setting. There are no hospital or anesthesia co-pays, minimal discomfort and nearly immediate return to normal activity.

We look forward to serving your needs. Please let us know if there is anything we can do to improve your experience with us.

Sincerely,

Hays Surgical Associates
